## Travel documentation for Profoto Lead-acid batteries contained in baggage

*To whom it may concern*

*We hereby declare that our Lead-Acid batteries distributed by Profoto, labeled PROFOTO or LEADER are classified as "UN 2800 Batteries wet, non-spillable" and are designed to prevent leakage of electrolyte from a ruptured or cracked case.*

*The battery meets the requirements in special provision A67 of IATA-DGR and is therefore considered as not regulated dangerous goods.*

*The battery is also packed in such way that the terminals are protected to prevent short circuit.*

*Product information is available from [www.profoto.com](http://www.profoto.com) and additional information can be provided directly from Profoto AB. Please use e-mail [info@profoto.com](mailto:info@profoto.com)*
